### Editorial

This editorial presents a long time existing scenario in family gender developing by chance leading to misbalances in family genders causing hardships on women and girl children, to creating Godly plausible prismatic gender balancing. It covers new development of producing designer baby by choice and not by chance and bringing new child care since inception to development of child from zero to hero. Many discovered reformations were brought to acquire new personality with enhanced life span enjoying comfortable life in new created deficit to surplus dream world.

Human biology had suffered mystery of believe that fortune of developing genders in family is decided by God; remained prevailing belief for centuries. There occurred plentiful discriminations and developing atrocities on women and girl children imposing rules of customs (paramparas) as per believes in countries. Many women and child protection and empowerment measures appeared and campaigns initiated by Savitri Bai Phule, celebrations as yearly memorizing day observed on Jan 3, every year, specifically in Maharastra [1]. Wise thinkers provoked such situation to remain always in existence provoked saying in the name of customs largely called as paramparsa. This situation of making dominance continued for centuries. In 1905 a genetic XX-XY (Female – Male), gender theory got discovered by Wilson and Steven, in 1905, (Singh, 2016) [2]. This genetic gender theory became a scientific base support for people to think with scientific reasoning about gender developments. However, there occurred aberrations in the expected results in gender developments for which an innovative study [3] was brought under pondering about the gender developing aberrations. The medical Doctors were fully aware of this genetic theory and the process of gender development, but involvement of stint of business made the advancement remain inaccessible for most of gentries in need of it. It is also a subject

where things occur in random process and all world gentries over 76% developed in unplanned way, even in highly developed country Switzerland. The unplanned development of genders occurred as on God's will. While everyone involves in the process of gender development in new generation. The real fact and belief in getting blessings of different goddesses are prevalent for which number worships (Pujas) and fasting's- bathing as holidays are well known events in India.

**Figure 1:** Depicts Peoples' crowd worshipping getting godly blessing at Kamlaha Devi temple around Varanasi for having child, which might be of any first or balancing family gender.

There exist many such temples in locations where both ladies and gents vest as per their believes. Devotees throng Maa Kamlaha Devi Temple for getting blessings, huge rush getting controlled by police force. This scene depicts tremendous need of prismatic gentry balancing in countries world over on one or the other pretext. Such shrines are plentifully spreading in urban and rural domiciles. This huge rush implicate that there is tremendous need of the innovative prismatic gender balancing for the countries world over. In year 2021 a study was brought on pondering on the aberrations in the gender theory, which led to developments of thinking on such aberrations [3]. Based on several research endeavors a new perfection in the original discovery of gender was brought [4]. Following this a Godly plausible new prismatic gender balancing was developing in 2021 [5]. After this accomplishment inspiration appeared to bring a new child care up keep bringing baby by choice and not by chance. The study made tremendous progress on developing decent personality [6] vis a vis displayed factors which produced bad personalities [7]. Many genetic reformations were brought in the human personality development enabling people resolve many unforeseen exogenic factors caused situations to manage their problems that occur in one's life time [8]. It was possible to bring a genetic control measure for indiscriminate gun shooting in the United State America and elsewhere [9]. Gender misbalance in families was proven as unwanted situation for decency in society. Rowdiness prevailed at large and made life of women and girls very troublesome. Thus the gender balancing was deemed to have strong impact on empowering women & girls, not in any one but for most of the countries. The women organizations cried for the bad environment, but problem remained of genetic character.

Global impact includes UN Sustainable Development Goal (SDGs) 5 (Gender Equality), 9 (Industry, Innovation and Infrastructures), 11(Sustainable cities and Communities) which consider the Female: Male ratio parity, as main set back hindering the accomplishments. Climate and environmental sustainability, Economic growth and poverty reduction. Under will get affected by the parity of Equality While the global population parity remains important individual family mis balances also cause lot of disadvantageous situations. Previous studies had brought family gender balancing, which remained as an important aspect to be taken up at family front. Among many the art and science legacy of following nature will get be highly affected by the balanced genders. Inspiring examples are Marie curing (pioneering female scientists), Malala Yousufzai), Jaane Goodall (Conservation and Science leader). Women led tech startups and innovations like legacies can be made survive forever by gender balanced families. These developments will foster Science and Technologies to prosperity marching without any repetitions and wastage of resources and time. The prismatic gender balancing is highly important outlooked bringing advantages. Therefore, combining both the avenues one can understand the tremendous scope of benefits of prismatic gender balances in families. This research endeavored enhancement in longevity of life span [10]. The author brought new eco system services to produce from deficit to surplus new world [11]. Many research publications have been brought to create the dream world with Saffron economy [12]. The gender balanced family will charter ecosystem services which bring new world from deficit to surplus dream world with plentiful employment opportunities [13]. New theory of least strenuous path & least energy expenditure was discovered that will solve many problems of nutrient building soil health causing problems of pollution, environment and water protection with ease and liking from reluctance in agriculture to liking in the people towards the natural sciences [14]. The new gender balancing will be highly accessible to the gentries. It needs bringing awareness to the people. Thus, nature based Godly plausible gender balancing having plentiful scope to produce many benefits of conservation of legacy forever, building secondary natural resources, advancing science and technology, without wasting resources and time.
